Some incrustation, taste and colour issues can be expected. It may be necessary to use treatment systems to improve water quality, as mentioned in the hydrogeological report, Consolidated Hydrogeological Evaluation and Terrain Analysis dated March 16, 2011, prepared by Paterson Group Inc. Treatment by water softeners may increase the sodium content of the water. Persons on sodium restricted diets, including those with hypertension, should use a separate drinking water supply and should consult their physician for further advice on the use of the water if the sodium level in the drinking water exceeds 20mg/l.
